React.js
DATABASES
MySQL
FAMILIER
Git , GitHub , Linux
Others
Networking , CCNA , Cyber Security

COURSES WORK

Data Structure
Algorithms
Computer Networks
Object Oriented Programming
Database Management System

PROJECTS

IoT Car Parking System
- *Developed an IoT-based parking system using Arduino Uno, IR sensor, and servo motor to manage access.*
- *Programmed Arduino to track vehicle entry/exit, updating available spaces displayed and automating gate control.*
- *Used Arduino app for remote operation, enhancing efficiency and user experience with real-time space management.*
- *Successfully implemented and demonstrated the system, showcasing practical smart parking solution potential.*

PORTFOLIO WEB APP
- Created a personal web portfolio to showcase professional skills, projects, and achievements.
- Designed a user-friendly interface with responsive design, ensuring accessibility across all devices. Integrated interactive elements such as project galleries, blogs, and contact forms.
- Successfully demonstrated technical proficiency and creativity, resulting in increased visibility and professional opportunities

INTERESTS
- Playing Football
- Listening Music
- Surfing Internet
- Travelling
